Q1

Quarterly Market Review First Quarter 2022

Quarterly Market Review

First Quarter 2022

This report features world capital market performance and a timeline of events for the past quarter. It begins with a global overview, then features the returns of stock and bond asset classes in the US and international markets.

The report also illustrates the impact of globally diversified portfolios and features a quarterly topic.

Quarterly Market Commentary

First Quarter 2022 - April 15, 2022

And just like that, two years have passed since spring 2020. Two years since none of us had a clue how long COVID would linger ... or how quickly today would arrive. Time can confound us that way, magically managing to crawl and fly at the same time.

Capital markets are often as confounding, as they convert time plus human enterprise into investment returns. Scanning analysts' recaps on the quarter just past, a dominant theme soon emerges: "confusing," "eventful," "uncertain," "complicated," "extremely volatile," and "wild ride," are just a few of the descriptors found. As one <u>analyst</u> summarized:

"The market's focus on Russia's invasion of Ukraine is being interrupted by the supply-chain effects of Covid lockdowns in Chinese technology hub Shenzhen, imminent tightening by the Federal Reserve as it tries to catch up with inflation, and the risk to the reflation story as consumer sentiment is crushed by rising prices. The result is a confused, and confusing, market."

That's a lot to take in. Which is all the more reason to focus on the lessons time already has taught us about "confused, and confusing" times.

Take, for example, concerns that the recently inverted yield curve for U.S. treasuries and planned

increases in the Fed's target funds rate may signal that a recession is nigh. If it happens, that's not ideal. However, manageable doses of these same events could be an antidote to painfully high inflation, an eventual boon for shorter-duration bond yields (as described in this Wall Street Journal column by Jason Zweig), and a catalyst for existing allocations to value stocks.

This makes it tricky for investors and markets alike (which, after all, are merely a construct of our own devise) to sort out what even qualifies as "good" and "bad" news from one moment to the next. This likely translates into the volatile market pricing we've seen of late.

Fortunately for disciplined investors like us, it's unnecessary to get swept up by erratic signals, or tricked into assuming a false sense of urgency. Today more than ever, we believe it makes the most sense to keep our eyes and your investments focused on the horizon of your goals.

This means continuing to deploy the same core principles we use across time and through various market conditions. If your investment portfolio is already well-structured for your needs, you should already be positioned as effectively as possible in the face of future unknowns. More pointedly to current events, your portfolio should already be appropriately

allocated among the push-and-pull concerns related to potential inflation, rising interest rates, recessions, and similar risk/reward tradeoffs. This includes:

- Hedging against inflation:
 Protecting your upcoming cash flow needs against inflation by incorporating an element of inflation-indexed assets
- Outperforming inflation:
 Remaining invested in assets
 that are expected to outperform inflation over time

Again, even a best-laid plan doesn't guarantee success. But it serves as the most logical course toward your end goals. Consider, for example, this inspiring sentiment from a real-life "Queen's Gambit" Brazilian chess champion Cibele Florêncio:

"Don't underestimate the pawn. You get it to the other side and it can become a queen."

How else can we assist you with your own investment strategies? As always, we look forward to our next conversation with you.

Eric Hutchens

Country Returns

First quarter 2022 index returns

Past performance is no guarantee of future results.

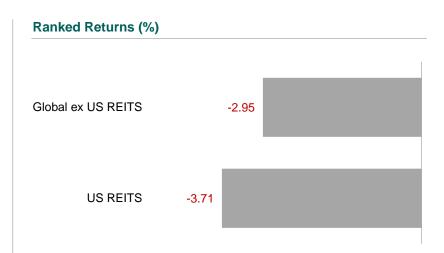

Country returns are the country component indices of the MSCI All Country World IMI Index for all countries except the United States, where the Russell 3000 Index is used instead. Global is the return of the MSCI All Country World IMI Index. MSCI index returns are net dividend. Indices are not available for direct investment. Their performance does not reflect the expenses associated with the management of an actual portfolio. Frank Russell Company is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. MSCI data © MSCI 2022, all rights reserved.

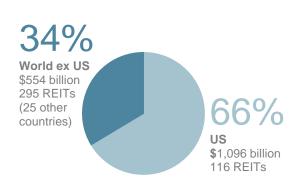

Real Estate Investment Trusts (REITs)

First quarter 2022 index returns

US real estate investment trusts underperformed non-US REITs during the quarter.

Total Value of REIT Stocks

Period Returns (%)

Period Returns (%) * Annuali.						
Asset Class	QTR	1 Year	3 Years*	5 Years*	10 Years*	
Global ex US REITS	-2.95	7.00	2.85	4.66	5.72	
US REITS	-3.71	27.72	9.90	8.89	9.17	

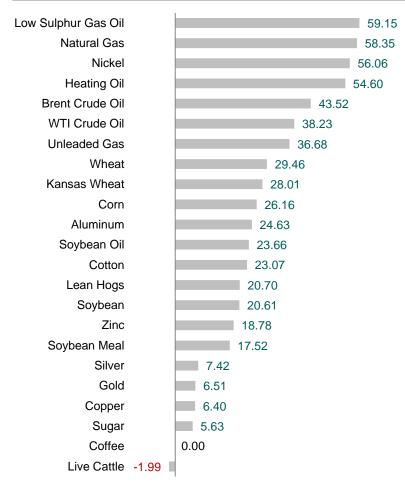

Commodities

First quarter 2022 index returns

The Bloomberg Commodity Index Total Return returned +25.55% for the first quarter of 2022.

Low Sulphur Gas Oil and Natural Gas were the best performers, returning +59.15% and +58.35% during the quarter, respectively. Live Cattle and Coffee were the worst performers, returning -1.99% and 0.00% during the quarter, respectively.

Period Returns (%)

Asset Class	QTR	1 Year	3 Years*	5 Years*	10 Years*
Commodities	25.55	49.25	16.12	9.00	-0.70

Fixed Income

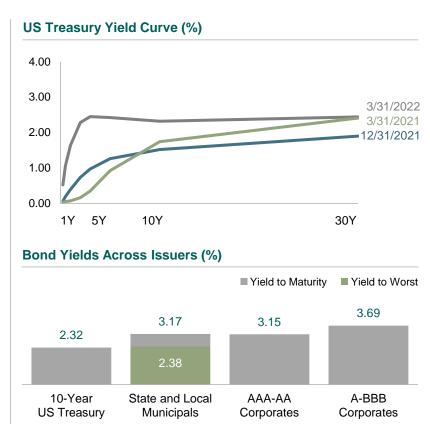

First quarter 2022 index returns

Interest rates increased across all maturities in the US Treasury market for the quarter.

The yield on the 5-Year US Treasury Note increased 116 basis points (bps) to 2.42%. The yield on the 10-Year US Treasury Note increased 80 bps to 2.32%. The yield on the 30-Year US Treasury Bond increased 54 bps to 2.44%. On the short end of the yield curve, the 1-Month US Treasury Bill yield increased 11 bps to 0.17%, while the 1-Year US Treasury Bill yield increased 124 bps to 1.63%. The yield on the 2-Year US Treasury Note increased 155 bps to 2.28%.

In terms of total returns, short-term corporate bonds returned -3.73% and intermediate-term corporate bonds returned -5.25%.1

The total return for short-term municipal bonds was -3.33% and -5.77% for intermediate-term municipal bonds. Within the municipal fixed income market, general obligation bonds outperformed revenue bonds, returning -6.07% versus -6.54%, respectively.²

Global Fixed Income

First quarter 2022 yield curves

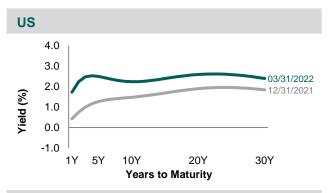

Interest rates increased across all maturities within the global developed markets for the quarter.

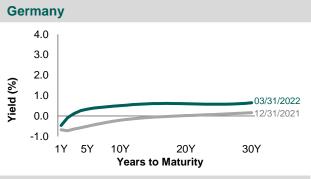

Realized term premiums were negative in the global developed markets.

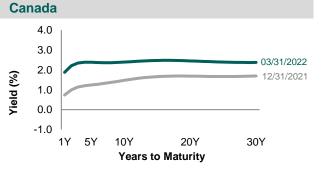

In Japan and Germany, intermediate-term nominal interest rates became positive during the quarter. However, short-term nominal interest rates remained negative in these markets.

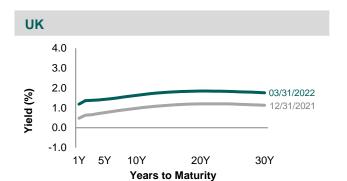

Changes in Yields (bps) since 12/31/2021

	1Y	5Y	10Y	20Y	30Y
US	130.0	123.0	76.4	69.5	55.5
UK	70.7	66.5	65.5	64.2	63.2
Germany	21.3	84.4	71.4	58.3	48.4
Japan	1.6	11.5	14.1	21.3	21.2
Canada	115.0	114.3	91.8	76.7	68.0
Australia	70.3	124.1	116.9	89.0	86.7

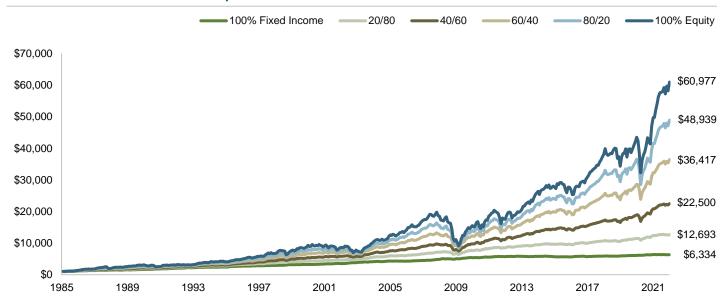

Impact of Diversification

As of December 31, 2021

These portfolios illustrate the performance of different global stock/bond mixes and highlight the benefits of diversification. Mixes with larger allocations to stocks are considered riskier but have higher expected returns over time.

Period Returns (%)					* An	nualized
Dimensional Core Plus Wealth Index Model	3 Months	1 Year	3 Years*	5 Years*	10 Years*	10-Year STDEV ¹
100% Equity	6.61	22.63	21.12	14.57	13.24	14.11

100% Fixed Income	-0.51	-0.93	2.20	1.98	0.97	1.73

Growth of Wealth: The Relationship Between Risk and Return

Diversification does not eliminate the risk of market loss. For illustrative purposes only. Past performance is no guarantee of future results. The performance reflects the growth of a hypothetical \$10,000. Assumes all models have been rebalanced monthly. See appendix for allocation information. All performance results are based on performance of indexes with model/back-tested asset allocations; the performance was achieved with the benefit of hindsight; it does not represent actual investment strategies. The index models are unmanaged and the model's performance does not reflect advisory fees or other expenses associated with the management of an actual portfolio. In particular, Model performance may not reflect the impact that economic and market factors may have had on the advisor's decision making if the advisor were actually managing client money. The models are not recommendations for an actual allocation. Indices are not available for direct investment. Backtested performance results assume the reinvestment of dividends and capital gains. Sources: Dimensional Fund Advisors LP for Dimensional Indices. Copyright 2022 S&P Dow Jones Indices LLC, a division of S&P Global. All rights reserved.

^{1.} STDEV (standard deviation) is a measure of the variation or dispersion of a set of data points. Standard deviations are often used to quantify the historical return volatility of a security or portfolio.
